**Subject: Application for Official Plan Amendment
Environmental Impact Assessment & Hydrogeological Review
Proposed Cement Plan - Colacem Canada Inc.
County Road 17, Township of Champlain
Roll # 020900700123700**

Dear Louis,

Since South Nation Conservation's (SNC) correspondence dated August 4, 2016, we have received the following document for the above-noted proposed development:

- i. Technical Memorandum - Information Response to South Nation Conservation.
Prepared by Golder Associates. Signed and dated October 24, 2016.

After review, we offer the following comments:

Environmental Impact Study

SNC has reviewed the response and the information provided has addressed SNC's previous comments. Provided all the mitigation measures described in the February 2016 Golder report are properly implemented, we have no further comments.

Groundwater Supply Review

SNC has reviewed the response and the information provided has addressed SNC's previous comments as long as no water from a well is used in the development without further studies, as suggested in the response.

I hope this letter is to your satisfaction, but should you have any questions please do not hesitate to contact me.

SOUTH NATION
CONSERVATION
DE LA NATION SUD

Sincerely,

A handwritten signature in black ink, appearing to read 'Mathieu'.

Mathieu Leblanc
Acting Team Lead - Planning
